

Summary of the Management and Control System

Authorities	Assessment by institution	Existing mitigating factors/Compensating controls which directly influence assessment made at system level ¹	Residual risk to regularity ²	Overall conclusion by system
Managing Authority	The management and control system established by the Managing Authority is determined as category 2 - works, but some improvements are needed Category 2	As the Managing Authority has delegated implementation of the most of the functions to the Responsible and Co-operation institutions substitute controls are implemented within these institutions, however the Managing Authority strengthened its controls and monitoring of the delegated functions significantly.	Low	Works, but some improvements are needed Category 2
Intermediate bodies	In general terms it can be concluded that the functions at the Intermediate body level have been implemented and the management and control system works, but some improvements are needed. Category 2	Findings of the management and control system audits do not have a significant effect to the entire management and control system. In the opinion of the Audit Authority there are factors that significantly reduce risks of the management and control system: <ul style="list-style-type: none"> - The Managing Authority had strengthened its controls and monitoring of the delegated functions: <ul style="list-style-type: none"> - evaluation of adequacy of all internal procedures of Intermediate bodies; - evaluation of the quality of delegated function (verifications at the level of the Intermediate bodies and performance of on-the-spot checks at level of beneficiaries); - Performance of on-the-spot checks (the risky projects). - The Certifying Authority performed its controls of the management and control system: <ul style="list-style-type: none"> - the Certifying Authority evaluated the procedures of Intermediate bodies on key areas. 	Low	

¹ Factors that significantly reduce risks of the management and control system

² Residual risk to be evaluated in one of the following categories: *Very low; Low; Medium; High*

Authorities	Assessment by institution	Existing mitigating factors/Compensating controls which directly influence assessment made at system level ¹	Residual risk to regularity ²	Overall conclusion by system
		<ul style="list-style-type: none"> - verified the practical implementation of the procedures and determined the level of reliance/confidence for each Intermediate body the Certifying Authority is performing random check of payment claims. - The Managing Authority has prepared and distributed guidelines regarding minimal publicity requirements; - The Managing Authority has updated guidelines for determining financial corrections for non-compliance with the rules on public procurement; - Detailed internal procedures are prepared and updated in regards to the additional requirements. - Institutions have internal audit units that are involved in risk management to identify/reduce the possible risks; procedures set in order to report on irregularities; working groups established to evaluate risks within the institution. 		
Certifying Authority	<p>The management and control system established by the Certifying Authority is determined as works well.</p> <p>Category 1</p>	In order to ensure the Certifying Authority with all necessary information on eligibility of the expenditure the Managing Authority once in a half year submits the report from the head of the Managing Authority to the Certifying Authority, in which there are described the results of checks of the information in Management Information System, follow-up of the Managing Authority recommendations, status of audit recommendations, statistical and etc. relevant information.	Very low	
Paying Authority	<p>The management and control system established by the Paying Authority is determined as works well.</p> <p>Category 1</p>	N/a	Very low
